

IL-18-2 (611A12.1)

Protein: Interleukin-18

UniProt

Function: Augments natural killer cell activity in spleen cells and stimulates interferon gamma production in T-helper type I cells. Subcellular location: Secreted.

IHC comment

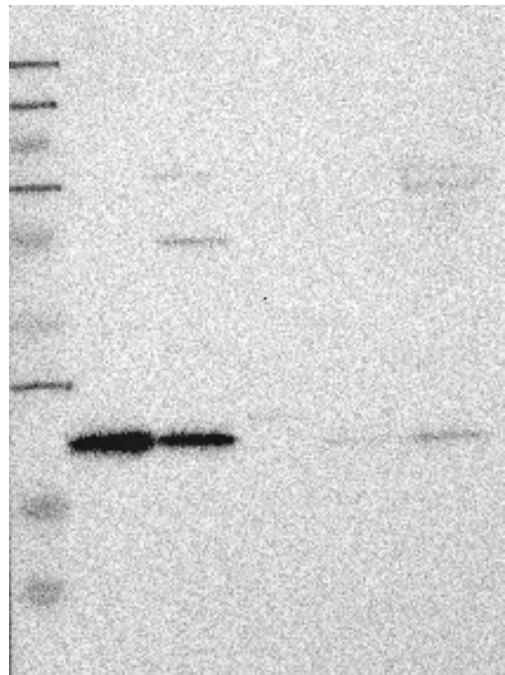

Failed due to cytoplasmic staining mainly in liver and skeletal muscle.

IHC protocol

HIER pH 6
Diluted 1:75

IHC. Skeletal muscle

WB. Supportive (Band of predicted size in kDa (+/-20%) with additional bands present)
