Immunohistochemistry

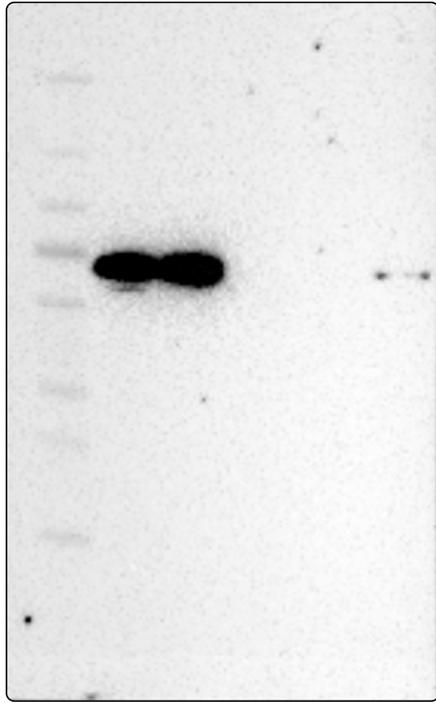

IHC protocol:	HIER pH6, Dilution 1:250
IHC test staining:	No positivity was observed.
Literature conformance:	Not consistent with gene/protein characterization data
Literature significance:	
RNA similarity:	Very low consistency between antibody staining and RNA expression data
RNA tissue specificity:	Tissue enhanced (stomach 1, urinary bladder)
RNA tissue distribution:	Detected in many
IHC Sibling similarity:	Other antibody shows dissimilar IHC staining pattern
