

Ornithine decarboxylase

ODC1-2 (CAB035997)

Immunohistochemistry

IHC protocol: HIER pH 6, Dilution 1:200

IHC test staining: Cytoplasmic staining in e.g. intestine, testis, liver and pancreas, but also in inflammatory cells.

Western blot

WB Size markers (kDa): 230, 130, 95, 72, 56, 36, 28, 17, 11

WB Lanes: Marker(1), RT-4(2), U251 MG(3), Plasma(4), Liver (5), Tonsil(6)

WB Target weight (kDa): 51, 8, 5

WB Validation: Supportive (Band of predicted size in kDa (+/-20%) with additional bands present)

ODC1-3 (CAB035998)

Immunohistochemistry

IHC protocol: HIER pH 6, Dilution 1:750

IHC test staining: Cytoplasmic staining in e.g. intestine, testis, liver and pancreas.

Western blot

WB Size markers (kDa): 230, 130, 95, 72, 56, 36, 28, 17, 11

WB Lanes: Marker(1), RT-4(2), U251 MG(3), Plasma(4), Liver (5), Tonsil(6)

WB Target weight (kDa): 51, 8, 5

WB Validation: Supportive (Band of predicted size in kDa (+/-20%) with additional bands present)
