

STANDARD OPERATING PROCEDURE

Title: Antibody Evaluation (iMRM) by Carr Laboratory at Broad Institute

SOP#: M-145

Version #: 1

Author: T. Hiltke

Date Approved: July 15, 2022

Date Modified:

1. PURPOSE

The purpose of this document is to describe the evaluation of antibodies using iMRM by the Carr Laboratory at Broad Institute for the NCI Antibody program.

2. PROCEDURE

Antibodies developed for the Broad Institute lab of Dr. Steven Carr were selected and characterized by his laboratory using iMRM.

All procedures have been developed and are performed according to their standardized methods.

Outlines of their evaluation processes can be found at:

<https://www.broadinstitute.org/proteomics/protocols>
